

2018 Prime Preferred Drug List

The Universal Rx Prime Drug Formulary identifies commonly prescribed generic and brand drugs. While this document does not identify a specific copay tier for each medicine, drugs on this list are preferred for use and will generally be assigned lower copays defined by your drug benefit plan. If your prescription drug plan includes a three-tier copay structure, these drugs would go through at the preferred copayment tiers. Your plan documents may have coverage requirements or limitations that may exclude certain drugs or drug classes. Please review your benefit documents for information about specific medicines, and if you have questions please call the phone number printed on your member ID card. Also, when you are with your doctor and a prescribed medicine is going to be part of your treatment, please ask your doctor to prescribe a generic drug when it is appropriate. **Please note that a brand name drug may move to nonpreferred status if a generic becomes available during the year.**

KEY: CAPITAL letters – Preferred BRAND drugs, lower case letters – generic drugs, [INJ] – Injectable medicines
